

# CYBER SECURITY

It's a jungle out there

Predators lurk in the vast and dangerous landscape of the internet to seize valuable data.

Trusting Managed Service Providers alone **may not be the safest solution.**

Companies often solely rely on Managed Service Providers to guide them through the wilderness, but true data protection lies with safeguarding data throughout its entire journey.

**39  
Seconds**

A cyber attack occurs every 39 seconds. With around 2,220 cyberattacks each day, that equates to over 800,000 attacks each year.

**\$4.4  
Million**

Total average cost of a data breach in the US.

## Protecting Data in Transit

The solution is for companies to prioritise data protection and trust Certes unique Layer 4 Solution to keep their data safe in the cyber jungle. A technology solution that is simple, scalable and uncomplicated.
